

Schedule of AK-Ulrich Group Meeting in Annweiler, 2-5 August 2015

Time	Sunday 2/8	Monday 3/8	Tuesday 4/8	Wednesday 5/8
8.00		Breakfast	Breakfast	Breakfast
9.00	Travel from Karlsruhe	Session 3. E5/PDGFR (Jochen) Dirk <i>Hydrophobic mismatch drives the interaction of E5 with the transmembrane segment of the PDGF receptor</i> Katharina <i>Latest updates about 3 sticky proteins: BrsG, E5 and PDGFR on the test bed</i> Xu <i>Distance measurements using CPMG on PGLa and E5</i>	Session 7. Bachelor students I (Stephan) Dennis <i>Optimierung der Synthese Coumarin-markierter zellpenetrierender Peptide</i> Jens <i>Untersuchung der Wechselwirkung zwischen dem Tat-abhängigen Signalpeptid und der TatA-APH mittels CD-Spektroskopie</i> Saskia <i>Einflüsse von membranaktiven Peptiden auf Lipidmembranen mittels DSC und ³¹P-Festkörper-NMR-Spektroskopie</i>	Session 9. Photoswitching (Sabine) Igor <i>Photodynamic therapy - past, present and future</i> Oleg B <i>Photoswitchable gramicidin S analogues in cancer therapy: in vitro and in vivo study</i> Alexander <i>Fluorescent reporters with increased information content</i>
10.45		Discussion and coffee	Discussion and coffee	Discussion and coffee
11.15		Session 4. Peptides I (Johannes) Philip <i>DCD update – published data vs. reality</i> Erik <i>Alanine scan of BP100</i> Parvesh <i>Beyond</i>	Session 8. Bachelor students II (Christina) Tabea <i>Herstellung von ¹³C- und ¹⁵N-vollmarkiertem Gpa als Testpeptid für Festkörper-NMR-Kontaktmessungen</i> Pia <i>Untersuchung der Proteaseaktivität der SplB Protease aus Staphylococcus aureus</i> Sabrina <i>Telomerlängenbestimmung durch terminale Restriktionsfragmentanalyse</i>	Session 10. Amino acids for ¹⁹F-NMR (Igor) Hanna Z <i>New CF₃-substituted phenylalanine analogue as a ¹⁹F-NMR-label</i> Dmytro <i>Solid state ¹⁹F-NMR for membrane-active peptides: the two labels strategy</i> Oleg M <i>Novel conformationally restricted fluoro- and CF₃-substituted alpha-amino acids with charged side chains</i>
13.00	Lunch	Lunch	Lunch	Lunch
14.30	Session 1. Introduction and Tat I (Chair: Birgid) [†] Anne <i>Welcome and introduction</i> [†] Erik <i>Seminar information</i> Torsten <i>Telomeres: A biomarker for senescence and the holy grail in cancer therapy?/Tat dependent translocation: An introduction to the translocation mechanism</i> Lena <i>Experimental proof for a surface alignment of the TatA TMS</i>	Session 5. Peptides II (Marina) Stephan <i>How bilayers are influenced by membrane-active peptides - a view from small angle scattering and solid state NMR</i> Sergii <i>On the role of methionine in PGLa</i> Sezgin <i>Update on structure and mechanism of the short peptaibol harzianin HK-VI</i>	Free for activities	Session 11. Optical spectroscopy and CPPs (Dirk) Jochen <i>Update on UV-CD12/ANKA and vacuum-UV SRCD studies of peptide films</i> Johannes R <i>Are protons or hydroxide ions translocated by TisB?</i> Marco <i>The effect on membrane translocation and perturbation by modulating the helicity of cell-penetrating peptides</i>
16.15	Discussion and coffee	Discussion and coffee		Discussion and coffee
16.45	Session 2. Tat II/TMD (Erik) Christina <i>Giant unilamellar vesicles (GUVs) are an attractive experimental model for studying the Tat dependent translocation system</i> Anja <i>Structural analysis of the transmembrane segment of T-cell receptor α in model membranes</i> [‡] Eva <i>Neue Einblicke in die Rolle des Membranproteins TatA bei der Tat-abhängigen Proteintranslokation</i>	Session 6. Biofilms (Sergii) Marina <i>The role of gramicidin S affinity to phosphoric metabolites in its anti-biofilm activity</i> Hannah K <i>The effect of peptide antibiotics on clinical multi-resistant biofilm forming enterococci</i> Jennifer <i>The action of antimicrobial peptides on clinical MRSA and their biofilm forming phenotypes</i>		Session 12. Peptides III/Simulations (Torsten) Sabine <i>New force field, new luck: simulations on the TisB dimer</i> Tomas <i>Insertion of a peptide into a membrane from MD simulation - harzianin and BrsG</i> Lucie <i>Biophysical study of amyloid peptides with membranes: interactions and structures determination</i>
18.30	Discussions	Discussions		Travel to Karlsruhe
19:00	Dinner	Dinner	Dinner	

Symbols: [†] Very short talk (5 min). [‡] PhD defense talk (20 min). No symbol: Master students, postdocs (25 min + 10 min)

Version from 150729

THE END
